CAREER SUMMARY

Results-oriented Frontend Engineer with 3 years of experience building scalable, responsive web applications using React and TypeScript. Strong aptitude for crafting user-empathic interfaces, collaborating across product, design and engineering teams, and delivering code that balances usability, performance and maintainability. Passionate about shaping intuitive user experiences at global scale—aligned with Dropbox's mission of making work more human.

EDUCATION

BACHELOR'S DEGREE | B.Eng Mechatronics | Federal University of Technology, Minna 2019- 2023

EXPERTISE

React.js | TypeScript | JavaScript (ES6+) | Git Version Control | HTML5 & CSS3 | Node.js | Responsive & Accessible UI Design | Cross-Browser & Cross-Device Performance | RESTful API Integration | Component Architecture | Agile/Iterative Development | Cross-Functional Communication | Code Review & Mentorship

PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER | Babs & Yusuf Proserv | Abuja, Nigeria Jan 2024 – present

Delivering responsive, high quality web solutions and technical support to enhance company operations and digital presence, using frontend expertise and IT insight.

- Spearheaded front-end design and development of the company's web platform using React + TypeScript, reducing page-load times by ~30% through modular component refactoring and asset optimization.
- Collaborated with UX designers and backend engineers to build reusable UI components, enhance API integration and ensure consistent user experience across devices.
- Introduced peer code-reviews and a shared component library, boosting front-end productivity and design consistency by ~25%.
- Managed front-end version control workflows, automated linting and style enforcement to support sustainable code health.
- ·Collaborated with cross-functional teams on UI design, training, and documentation to align digital experiences with brand and usability standards.

FRONTEND DEVELOPER | Self Employed | Remote Dec 2023 – Present

Partnering with small businesses and startups to design and develop scalable React-based applications, integrating APIs, and improving user engagement through modern web technologies.

- Worked closely with diverse clients and developed 4+ responsive websites using React, Tailwind CSS/Bootstrap/MUI, while considering UX and engagement, achieving an average Lighthouse performance score above 90.
- Supported content updates, CMS logic, and documentation hand-off training for clients to manage their sites independently.
- Translated Figma wireframes into reusable React components, enabling faster feature delivery and streamlined UI standards.

TOOLS & TECHNOLOGIES

React • TypeScript • JavaScript • HTML5 • CSS3 / TailwindCSS • Jira • Node js •TailwindCSS • REST APIs • GitHub • Figma • Zod • Confluence • REST APIs • Automated Build/CI • React Query
