Jesse Aporah B.Eng
+234 (704) 441 95149 – jesseaporah6@gmail.com
https://jesses-portfolio-website.vercel.app/

- Frontend developer with a strong foundation in HTML, CSS, React, TypeScript, and modern web technologies, experienced in building responsive, user-focused applications. Skilled in integrating APIs, managing state, and implementing scalable architectures to deliver efficient and maintainable solutions.

- A detail-oriented problem solver with a passion for clean UI/UX design and performance optimization. Adept at collaborating with teams, learning new technologies quickly, and developing intuitive digital experiences that enhance user engagement and overall product quality.

Areas of expertise include:

- React, TypeScript, and modern JavaScript (ES6+)
- State management (Context API, Zustand)
- Version control and collaboration using Git and GitHub
- Basic backend integration and understanding (Rest APIs, authentication flows)
- Frontend architecture and component-based design
- Form handling and validation (Formik, Yup)
- Performance optimization and reusable component design
- Experience with UI/UX using Figma
- API integration and asynchronous data handling
- Responsive design and UI development with Tailwind CSS
- Debugging, testing with Jest and problem solving

PROFESSIONAL EXPERIENCE

CogOps - Transiflow Project — **November 2025 to Present**

Tech Lead / Full stack developer

Career highlights

- Led efforts toward full-stack development of *Transiflow*, collaborating with designers, frontend, and backend developers to deliver a scalable production-ready application using React, React native, Typescript and Node js.
- Used HTML, Tailwind CSS, and React in an Agile environment for performance optimization and SEO.
- Worked closely with stakeholders to translate business requirements into technical solutions and marking up designs with Figma.
- Streamlined development workflows by introducing clearer task breakdowns, reusable components, and improved Git practices, reducing delivery time and rework.
- Conducted code reviews to maintain code quality, enforce best practices, and ensure consistency across the codebase.
- Oversaw API integration, authentication flows, state management, and deployment-ready builds.
- Mentored team members and supported onboarding through documentation and technical guidance.

Key Achievements:

- Led the end-to-end development of the Transiflow application, coordinating cross-functional teams to deliver a scalable, production-ready solution aligned with business requirements.
- Mentored and onboarded team members through documentation and enforced best practices.

Babs & Yusuf Proser January 2025 to December 2025

Frontend developer

Career highlights

- Delivered responsive, web solutions and technical support using HTML5, CSS3, React and TypeScript to improve the company operations and digital presence, with user's experience and company goal in mind.
- Spearheaded front-end development using React, TypeScript and MUI, optimizing performance by 25% through modular component architecture and asset compression for faster load times.
- Collaborated with cross-functional Agile teams, with UX designers and backend engineers to develop responsive, accessible UI components that ensure consistent experiences across devices and browser, as well seamless API integration.
- Translated Figma wireframes into reusable React components with a mobile-first, UX-driven approach, for speedy feature delivery and consistency.
- Utilized Git for version control to maintain multiple versions in case of errors. And ensure code quality through peer reviews.

Key Achievements:

- Delivered responsive web applications using HTML5, CSS3, React, and TypeScript, enhancing user experience and supporting business objectives.
- Maintained code quality and version control using Git, supporting collaborative development through peer reviews and efficient code management.

Freelance developer December 2023 to June 2024

- Partnered with several startups to develop scalable react-based applications, integrate with APIs, as well as use JavaScript and other modern technologies to improve user engagement and performance.
- Developed 4+ responsive websites using Tailwind CSS, Bootstrap, and translated Figma wireframes into reusable components achieving an average Lighthouse performance score above 90.
- Supported content updates, CMS logic while writing tests with Jest and React Testing Library, ensuring code reliability, maintainability and compliance with A11y and WCAG accessibility standards.

TECHNICAL PROFICIENCIES

- Software: Figma, Adobe photoshop, Canva,
- Tools: HTML, CSS, React, React Native, TypeScript, Javascript, Jest, Tailwind, Node, Tailwind, MUI, Chakra UI, Git/Github, Vercel
